Re: Larlen Communications, Inc.
WXPZ(FM), Clyde Township, Michigan
Facility Identification Number: 121239
Special Temporary Authority

Dear Ms. Harp:

This is in reference to the request filed February 22, 2011, on behalf of Larlen Communications, Inc. ("LCI"). LCI requests extension of the special temporary authority ("STA") granted on August 3, 2010, to operate Station WXPZ with temporary facilities.¹ In support of the request, LCI states that it has been unable to negotiate a lease agreement at the current site and that it is in the process of preparing an application for construction permit. LCI requests STA for operation with temporary facilities pending the filing, processing and implementation of an application for construction permit for permanent relocation of the station.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

¹ WXPZ is licensed for operation on Channel 211A (90.1 MHz) with effective radiated power of 0.02 kilowatt (H), 1.5 kW (V) (Max-DA) and antenna height above average terrain of 74 meters.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WXPZ may continue to operate with the following facilities:

Geographic coordinates:	42° 31' 49" N, 86° 09' 02" W (NAD 1927)
Channel	211 (90.1 MHz)
Effective radiated power:	Not to exceed 0.7 kilowatt (H&V)
Antenna supporting structure:	Existing farm silo
Antenna height:	
above ground:	39 meters
above mean sea level:	231 meters
Above average terrain:	35 meters

LCI must notify the Commission when licensed operation is restored. LCI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 10, 2011**.

Sincerely,

Charles N. Miller, Engineer
